

Sinclair Broadcast is a perfect example of what is going wrong in America today. Big business is allowed to push the limits of laws because they have the high-powered attorneys to guide them through the process. Use of the public airwaves should serve the public interest not be used to undermine our free election process by trying to sway voters to vote for their political candidate. We need to strengthen media ownership rules, not weaken them. The license renewal process needs to look at these issues and take them seriously. Thank you.
